ABOUT THE DEAD SEA

Facts: The Dead Sea is a unique wonder of the natural world. One of the saltiest bodies of water in the world, situated at the lowest place on Earth, the Dead Sea is a natural resource of sublime beauty and historical significance. Due to diversion of water from its historic source, the Jordan River, and human overexploitation of its minerals, the Dead Sea is vanishing before our eyes in an ongoing environmental catastrophe. The sea level drops by 1.2 meters every year and has already lost over 30% of its surface area. If we do not act to save it now, what will be left of the Sea in our lifetime will be just a puddle.

WWW.DSGPROJECT.COM

Our Plan: Our solution calls for stabilizing the water level of the Dead Sea via its natural source - freshwater from the Sea of Galilee (including some desalinated water from the Mediterranean Sea) flowing into the Jordan River will be combined with treated wastewater from the region, thus restoring the natural condition.
